

2026 IEEE International Conference on Information Reuse and Integration for Data Science (IRI) **IRI 2026**

Table of Contents

Conference Forward	xviii
Message from the Program Co-Chairs	xix
Organizing Committee	xxi
Program Committee	xxiii
Keynote Speakers	xxvi

Session A1: AI Systems, Agents & Cloud-Native Orchestration

SLA-Aware Incident Detection and Alert Routing via MCP in Distributed Systems	1
<i>Siva Rama Krishna Varma Bayyavarapu (DocuSign Inc), Vijayakumar Venganti (Independent Researcher), and Vishwanath Hiremath (Principal System/Software Engineer)</i>	
Event-Related MCP Agents for Asynchronous Enterprise Systems	6
<i>Siva Rama Krishna Varma Bayyavarapu (Independent Researcher), Vishwanath Hiremath (Independent Researcher), and Vijayakumar Venganti (Independent Researcher)</i>	
Skill-Based Architecture for Reusable, AI-Native Enterprise Modules: An Empirical Study	11
<i>NIKHIL RAMESH JATHAR (AvanSaber, Inc., San Antonio, TX, USA)</i>	
RESO-Net: A Reusable Event-Driven AI Framework for Intelligent Network Slice Orchestration in Cloud-Native Telecom Systems	17
<i>GOPALAKRISHNAN MARIMUTHU (Independent Researcher)</i>	
Toward Reusable AI for Edge Offloading: An Empirical Study Under Varying IoT Workloads	
Track Name	23
<i>Yixin Zhang (School of Science, Engineering and Technology, Penn State Harrisburg, The Pennsylvania State University), Hai Anh Tran (School of Information and Communications Technology, Hanoi University of Science and Technology), and Truong Tran (School of Science, Engineering and Technology, Penn State Harrisburg, The Pennsylvania State University)</i>	
A Lightweight Causal Evidence Pipeline for Root-Cause Localization in Cloud-Native Systems.....	29
<i>Mukesh Dua (Independent Researcher), Aniruddha Singh Gautam (Independent Researcher), Raju Chowdhury (Independent Researcher), and Tarun Kundu (Independent Researcher)</i>	

Session A2: Explainable AI & Trustworthy Systems

Quantifying the Affective Gap: A Zero-Shot Evaluation of LLMs on Fine-Grained Emotion Taxonomies	33
<i>Lawrence Obiuewewi (Old Dominion University), Krzysztof J. Rechowicz (Old Dominion University), Jessica M. Johnson (Old Dominion University), Vikas Ashok (Old Dominion University), Sachin Shetty (Old Dominion University), and Sampath Jayarathna (Old Dominion University)</i>	
Epistemic Edge: Subjective Logic Guardrails for LLM-Driven IoT Actuation	37
<i>Muntaser Syed (Florida Institute of Technology, USA) and Marius Silaghi (Florida Institute of Technology, USA)</i>	
Harmonizing Mass-Shooting Databases for Cross-Source Risk Classification	41
<i>Neha Sharma (Virginia Commonwealth University) and Ritesh Sharma (Virginia Commonwealth University)</i>	
Evaluating Classical Deepfake Detection Paradigms on the DF40 Image Benchmark	45
<i>Barbara Karina Alfaro Purisaca (Southern Alberta Institute of Technology, Canada), Yulian Andre Cama Castillo (Southern Alberta Institute of Technology, Canada), and Reeta Suman (Southern Alberta Institute of Technology)</i>	
Routing Collapse in Classification-Head-Based Mixture-of-Experts Models for Aspect-Based Sentiment Analysis	49
<i>Pranav Chowdary Nagothu (Department of Computer Science, Georgia State University, Atlanta, GA, USA), Kiril Kuzmin (Department of Computer Science, Georgia State University, Atlanta, GA, USA), and Mario M. KubeK (Department of Computer Science, Georgia State University, Atlanta, GA, USA)</i>	
Comparison of Explainable AI Techniques for Early Detection of Potential Prediction Failures	53
<i>Shan Suthaharan (University of North Carolina at Greensboro, USA)</i>	
Tracing the Origin: Source Attribution of Social Media Profile Images Using Deep Ensemb	57
<i>Biodoumoye Bokolo (Sam Houston State University) and Liu Qingzhong (Sam Houston State University)</i>	

Session B1: LLM Fine-Tuning, Evaluation & Reasoning

Benchmarking SLM and LLM in Feature Generation for Interpretable Automated Essay Scoring	61
<i>Kevin Chovanec (University of Wisconsin - Madison), John Fields (Concordia University Wisconsin), and Praveen Madiraju (Marquette University)</i>	
Latent Confidence Alignment for LLM Self-Assessment	68
<i>Ting-Yu Chen (National Sun Yat-Sen University, Taiwan), Tingting Yu (National Sun Yat-Sen University, Taiwan), Pei-Cing Huang (National Sun Yat-Sen University, Taiwan), Chan Hsu (National Sun Yat-Sen University, Taiwan), Ming-Yen Lin (Kaohsiung Medical University Hospital, Kaohsiung Medical University, Taiwan), and Yihuang Kang (National Sun Yat-Sen University, Taiwan)</i>	

ADVENT: LLM-Driven Automatic Predicate Invention for ILP	74
<i>Tingting Yu (National Sun Yat-Sen University, Taiwan), Pei-Cing Huang (National Sun Yat-Sen University, Taiwan), Chan Hsu (National Sun Yat-Sen University), Chan-Tung Ku (National Sun Yat-Sen University), and Yihuang Kang (National Sun Yat-Sen University, Taiwan)</i>	
When Not to Edit: Reliability Diagnostics for Activation-Space Interventions in Language Models	80
<i>Nana Yaw A. Osafo (Howard University, USA), Ronald Doku (Howard University, USA), and Danda B. Rawat (Howard University, USA)</i>	
Evaluating and Improving Pedagogical Fit in LLM-Based AI Tutors with the Pedagogical Suitability Index	86
<i>Benjamin Barlog (University of Montana), Hudson Craig (University of Montana), and Zedong Peng (University of Montana)</i>	
Machine Learning Evaluation of Generative AI Debugging Feedback Plausibility for Introductory Python Programming	92
<i>Brendan Toscano (Acadia University, Canada), Lydia Bouzar-Benlabiod (Acadia University, Canada), and Darcy Benoit (Acadia University, Canada)</i>	

Session B2: Time Series Forecasting & Energy Analytics

CAP-STN: Continuous Adaptive Spatial Propagation for Large-Scale Spatio-Temporal Forecasting	98
<i>Mohammadreza Akbari Lor (University of Missouri-Kansas City), Shu-Ching Chen (University of Missouri-Kansas City), and Mei-Ling Shyu (University of Missouri-Kansas City)</i>	
Improving Zero Shot Forecasting with Support Series and Multivariate Sensor Context	104
<i>Harrison Thayer (California State University, Fullerton) and Anand Panangadan (California State University, Fullerton)</i>	
STAR: Spectral and Trend Adaptive Regime-Guided Forecasting for Multivariate Time Series	110
<i>Sheikh Abujar (The University of Alabama at Birmingham, Birmingham, AL, USA) and Chengcui Zhang (The University of Alabama at Birmingham, Birmingham, AL, USA)</i>	
Risk-Aware Multi-Task Graph Neural Surrogate for Operational Event Prediction in Distribution Feeders	118
<i>Bodong Hou (Florida State University), Wangjie Xu (ZJU-UIUC Institute), Simon Foo (Florida State University), Wei-bang Chen (Virginia State University), and Xuanchen Xiang (Virginia State University)</i>	
Understanding the Limitations of Machine Learning for IoT Anomaly Detection under Extreme Class Imbalance	125
<i>Juli Dutta (Sam Houston State University) and Qingzhong Liu (Sam Houston State University)</i>	

Session C1: Security, Privacy & Adversarial ML

Cross-Cutting Security Analysis of LLM-Generated Code via Metamorphic Testing and Association Rule Mining	129
<i>Zedong Peng (University of Montana), Chenggang Wang (University of Oklahoma), and Shangyue Zhu (Central Washington University)</i>	
A Privacy-Preserving Framework Using Remote Data Science for Inter-Institutional Student Retention Prediction	135
<i>John Fields (Concordia University Wisconsin), K M Sajjadul Islam (Marquette University), Ruchitha Thota (Concordia University Wisconsin), Victor Chen (Georgetown University), and Praveen Madiraju (Marquette University)</i>	
Which Genes Leak? Feature-Level Privacy Auditing for Synthetic Single-Cell RNA-Seq Data	141
<i>Shuya Feng (University of Alabama at Birmingham), Boyuan Feng (George Washington University), and Baocheng Geng (University of Alabama at Birmingham)</i>	
Learning-based Denial-of-Key-Generation (DoKG) Attack Against Quantum Key Distribution	149
<i>Shradha Awasthi (Purdue University Northwest, USA), Shafkat Islam (Purdue University Northwest, USA), and Md Tamjid Hossain (Texas A&M University-San Antonio, USA)</i>	
E3TR: Encrypted Evidence-Based Event Timeline Reconstruction Using Multi-Artifact Correlation for Network Forensics	153
<i>Ayodeji Yahaya (Sam Houston State University, United States) and Qingzhong Liu (Sam Houston State University, United States)</i>	
Towards Lightweight Defense against Gradient-Based Adversarial Attacks in Internet of Medical Things (IoMT) Systems	157
<i>Hengshuo Liang (University of Washington, Tacoma), Cheng Qian (Hood College), John Mulo (Towson University), Mian Qian (University of South Carolina Upstate), Chao Lu (Towson University), and Wei Yu (Towson University)</i>	
MobileTransfer: Cross-Dataset Transfer Evaluation for Mobile-Money Fraud Detection	161
<i>Xiaoke Jia (Auburn University, USA), Zedong Peng (University of Montana, USA), and Chenggang Wang (University of Oklahoma, USA)</i>	

Session C2: Computer Vision I: Detection, Segmentation & Generation

Mitigating Task Interference in Multimodal Glioma Segmentation via Region-Specific Modality Gating	165
<i>Evan Savaria (Old Dominion University) and Jiangwen Sun (Old Dominion University)</i>	
SOM2IMG: Self-Organizing Map Based Tabular-to-Image Transformation for Deep Learning	171
<i>William Selke (University of Washington, USA.) and Wooyoung Kim (University of Washington, USA)</i>	

CoDiM: Contrastive Distillation into Generative Models for Scalable Dataset Distillation	177
<i>Quang Duy Hoang (Faculty of Information Technology, Hanoi University of Civil Engineering), Nam Thang Hoang (Faculty of Information Technology, Hanoi University of Civil Engineering), Huy Hieu Nguyen (School of Information and Communications Technology, Hanoi University of Science and Technology), Hai Anh Tran (School of Information and Communications Technology, Hanoi University of Science and Technology), and Truong Tran (School of Science, Engineering and Technology, Penn State Harrisburg, The Pennsylvania State University)</i>	
PMRR: AI-assisted Prototype-guided Mask Registration and Restoration Network for Quantum Ghost Imaging	183
<i>Shaian Khan (University of Missouri-Kansas City), Mei-Ling Shyu (University of Missouri-Kansas City), Shu-Ching Chen (University of Missouri-Kansas City), Nathnael Kahassai (University of Missouri-Kansas City), Ahmed Hassan (University of Missouri-Kansas City), and Hichem Guerboukha (University of Missouri-Kansas City)</i>	
Graph Generation through Self-alignment in Transformer-based Discrete Diffusion Model	189
<i>Kang Lu (Wayne State University, USA), Bohan Xiao (Wayne State University, USA), Lihui Liu (Wayne State University, USA), and Ming Dong (Wayne State University, USA)</i>	
FC-Siamese-xView2: Fully Convolutional Siamese Networks for Pixel-Level Building Change Detection in Earthquake Damage Assessment	195
<i>Yan Lu (Christopher Newport University), Ian Conner (Christopher Newport University), and Erika Ardiles-Cruz (US Air Force Research Laboratory)</i>	

Session D1: Healthcare AI I: Diagnostics & Risk Prediction

Identifying Patients at Risk of Sudden Cardiac Arrest using Graph Representation Learning on Electronic Health Records	201
<i>Fatemeh Ghaffarpour (University of Calgary, Canada), Emad A. Mohammed (Wilfrid Laurier University, Canada), and Behrouz Far (University of Calgary, Canada)</i>	
Machine Learning Models for Predicting Cardiac Mortality in Chronic Heart Failure Patients.....	207
<i>Itay B. Shabat (Florida Atlantic University), Chelsea M. Zuvietta (Florida Atlantic University), and Taghi M. Khoshgoftaar (Florida Atlantic University)</i>	
Stochastic k-Simplex Embedding in High-Dimensional Mass-Spectrometry Cancer Classification...	213
<i>Ethan D. Curtis (Florida Atlantic University), Preston Billion-Polak (Florida Atlantic University), and Taghi M. Khoshgoftaar (Florida Atlantic University)</i>	

The Multi-Modal Frontier: Synergizing Proteomics and Imaging for Precision Diagnostics and Mechanistic Discovery in Alzheimer's Disease	220
<i>Dominic Baker (Arizona State University, USA), Naven Goh (Arizona State University, USA), Prad Kadambi (Arizona State University, USA), Alexander Belnavis (Arizona State University, USA), Holly Steinhauer (Arizona State University, USA), Idara Akpan (Arizona State University, USA), Kelsi Watkins (Arizona State University, USA), Savannah Tallino (Arizona State University, USA), Haley Vanhof (Arizona State University, USA), Yun Xin Cho (Arizona State University, USA), Ditsa Mallick (Arizona State University, USA), Abigail Nordbeck (Arizona State University, USA), Sujato Mukherjee (Arizona State University, USA), Teresa Wu (Arizona State University, USA), and Judith Klein-Seetharaman (Arizona State University, USA)</i>	
Investigating Class Imbalance and Feature Importance for Predictive Diabetes Analysis	227
<i>James McCormack (University of Wisconsin - Eau Claire, USA) and Naeem Seliya (University of Wisconsin - Eau Claire, USA)</i>	
Raw EEG Image Representation for CNN-Based Dementia Classification	233
<i>Salleh Sonko (University of North Texas, USA), Wael Korani (University of North Texas, USA), Brian O'Connor (University of North Texas), and Gahangir Hossain (University of North Texas)</i>	
Automated and Interpretable Grading for Embryo Fragmentation via Deep Learning	239
<i>MingJhe Lee (Department of Electrical Engineering National Taiwan Ocean University), ChangHong Wu (Department of Electrical Engineering National Taiwan Ocean University), JungHua Wang (AI Research Center National Taiwan Ocean University), MingJer Chen (Department of Obstetrics, Gynecology and Woman's Health, TVGH), YuChiao Yi (Department of Obstetrics, Gynecology and Woman's Health, TVGH), and TsungHsien Lee (Department of Obstetrics and Gynecology, CSMU Hospital)</i>	

Session D2: Distributed Systems & Model Efficiency

SplitBench: Benchmarking Tool for Split Learning and Split Federated Learning	245
<i>Samuel Trepac (Mount Royal University), Joseph Mills (Mount Royal University), and Yasaman Amannejad (Mount Royal University)</i>	
MUC-FL: Block-Wise Marginal Utility Contribution for Communication-Efficient Federated Learning	251
<i>Akshay Mhatre (Texas A&M University-Central Texas), Vikram Karthick (Texas A&M University-Central Texas), Deepti Gupta (Texas A&M University-Central Texas), and Jia Zou (Arizona State University)</i>	
Predicting Performance for Co-Hosted DNNs in Frequently-Updating Environments	257
<i>Sarah Shah (Mount Royal University), Yasaman Amannejad (Mount Royal University), and Diwakar Krishnamurthy (University of Calgary)</i>	
On Optimal Modality Compression for Bandwidth Constrained Multimodal Fusion	263
<i>Mengchen Fan (University of Alabama at Birmingham), Fei Zhao (University of Alabama at Birmingham), Chengcui Zhang (University of Alabama at Birmingham), Shuya Feng (University of Alabama at Birmingham), and Baocheng Geng (University of Alabama at Birmingham)</i>	

Comparing Encoding Architectures for Supervised Contrastive Learning in Tabular Classification	269
<i>Preston Billion-Polak (Florida Atlantic University) and Taghi M. Khoshgoftaar (Florida Atlantic University)</i>	
Inference Under Opposition: Counterfactual Evaluation for Answer Stability in Large Language Models	275
<i>Md. Nafis Tahmid Akhand (United International University, Dhaka, Bangladesh), Khandakar Ashrafi Akbar (Towson University, Maryland, United States), and Bhavani Thuraisingham (The University of Texas at Dallas, Texas, United States)</i>	
A Data Science Approach for Evaluating Experience Variables in Insurance Risk Modeling	282
<i>Naibo Hu (Independent Researcher)</i>	

Session E1: Applied Data Science & Decision Support

A Data-Driven Optimization Framework for Profitable E-Waste Refurbishment in U.S. Recycling Systems	288
<i>Md Saifur rahman (Central Washington University, USA) and Md Abdullah Al Mahmud (Central Washington University, USA)</i>	
AI-Augmented Catastrophe Modeling with An Intelligent Orchestration Workflow	292
<i>Jainil Anilkumar Patel (University of Missouri–Kansas City), Tianyi Wang (Florida International University), Shahid Hamid (Florida International University), Mei-Ling Shyu (University of Missouri–Kansas City), and Shu-Ching Chen (University of Missouri–Kansas City)</i>	
A CatBoost-Based Ablation Study of Scheduling Heuristics in Automobile Repossession	298
<i>Andy Sinclair (Florida Atlantic University), Preston Billion-Polak (Florida Atlantic University), and Taghi M. Khoshgoftaar (Florida Atlantic University)</i>	
Risk-Stratified Explainability of Attorney Involvement in Workers’ Compensation Claims	304
<i>Chelsea M. Zuvieta (Florida Atlantic University), Gonzalo A. Vivian (Florida Atlantic University), and Taghi M. Khoshgoftaar (Florida Atlantic University)</i>	

TeleHSupport: A Multimodal, Literacy-Aware AI-enabled Kiosk for User-Centered Care Planning	310
<i>Faryaneh Poursardar (Health, Education, AI & Learning (HEAL), Office of Enterprise Research & Innovation, Old Dominion University, Suffolk, VA, USA), Saumya Dabhi (Health, Education, AI & Learning (HEAL), Office of Enterprise Research & Innovation, Old Dominion University, Suffolk, VA, USA), Ariana Montemayor (Ellmer School of Nursing, Macon & Joan Brock Virginia Health Sciences, Old Dominion University, Virginia Beach, VA, USA), Connor Haislip (Ellmer School of Nursing, Macon & Joan Brock Virginia Health Sciences, Old Dominion University, Virginia Beach, VA, USA), Janelle Clarke (Ellmer School of Nursing, Macon & Joan Brock Virginia Health Sciences, Old Dominion University, Virginia Beach, VA, USA), Grace Barthold (ODU Community Care Clinic, Center for Telehealth, Innovation, Education, and Research (C-TIER), Virginia Beach, VA, USA), and Tina Gustin (Ellmer School of Nursing, Macon & Joan Brock Virginia Health Sciences, ODU Community Care Clinic, Center for Telehealth, Innovation, Education, and Research (C-TIER), Virginia Beach, VA, USA)</i>	
MARS: Multi-Agent Re-ranking for Repeat-Order Food Delivery Recommendation	316
<i>Jiahao Tian (Georgia Institute of Technology) and Zhenkai Wang (The University of Texas at Austin)</i>	
An Integration Framework Reusing Geochemical Surveys in Crop Nutrient Management	322
<i>Sahana Jaware (heyblue.us, fuhsd.org) and Atul Dubey (aiclub.world)</i>	

Session E2: NLP, Sentiment & Multimodal Reasoning

The Challenges and the Potential of Multimodal Large Language Model-based Psychological Examination Tools	326
<i>Hwayeon Joh (Ewha Womans University, South Korea), Joohee Jung (Ewha Womans University, South Korea), SeongGyeong Ryu (Ewha Womans University, South Korea), SungHee Sohn (Simri, South Korea), and Uran Oh (Ewha Womans University, South Korea)</i>	
Detecting Memorization in LLM Generated Music	332
<i>Jacob Galajda (University of Central Florida) and Kien Hua (University of Central Florida)</i>	
Silicon Sampling via Cross-Survey Transfer	338
<i>Chan-Tung Ku (National Sun Yat-sen University, Taiwan), Chan Hsu (National Sun Yat-sen University, Taiwan), Pei-Cing Huang (National Sun Yat-sen University, Taiwan), Frank Cheng-shan Liu (National Sun Yat-sen University, Taiwan), I-Ling Cheng (National Chung Hsing University, Taiwan), and Yihuang Kang (National Sun Yat-sen University, Taiwan)</i>	
The .causal Format: Embedded Deterministic Inference for Domain-Agnostic Knowledge Graph Amplification	344
<i>David Tom Foss (Independent Researcher)</i>	

SentimentLens: Reconciling Sentiment and Ratings via Dual-Modality in the Hospitality Sector	350
<i>Dineth Jayakody (Old Dominion University, Department of Computer Science), Pasindu Thenahandi (Old Dominion University, Department of Computer Science), and Sampath Jayarathna (Old Dominion University, Department of Computer Science)</i>	
Blockchain Governance in the Era of Artificial Intelligence	356
<i>Bhavani Thuraisingham (The University of Texas at Dallas, USA)</i>	
ForEx: A Formal Verification Framework for Explainable Reasoning in Logical Fallacy Detection and Annotation	362
<i>Pei-Cing Huang (National Sun Yat-Sen University), Chienyu Liu (National Sun Yat-Sen University), Chan Hsu (National Sun Yat-Sen University), Ci-Siang Chen (National Sun Yat-Sen University), Pei-Ju Lee (National Chung Hsing University), and Yihuang Kang (National Sun Yat-Sen University)</i>	

Session F1: EM-RITE Workshop

The Impact of Paid Generative AI on Quality of Life: A Poverty Premium Perspective	368
<i>Wei-Lun Chang (National Taipei University) and Yan-Yi Huang (National Taipei University)</i>	
VeriPromiseESG4K: A Traditional Chinese ESG Promise Verification Dataset for AI CUP 2026	372
<i>Min-Yuh Day (Graduate Institute of Information Management National Taipei University New Taipei City, Taiwan), Wei-Chen Huang (Department of Statistics National Taipei University New Taipei City, Taiwan), Hsin-Ting Lu (Graduate Institute of Information Management National Taipei University New Taipei City, Taiwan), Wen-Ze Chen (Graduate Institute of Information Management National Taipei University New Taipei City, Taiwan), Yu-Han Huang (Department of Accounting National Taipei University New Taipei City, Taiwan), Ching-Tai Chen (Department of Computer Science University of Taipei Taipei, Taiwan), and Yohei Seki (Institute of Library, Information and Media Science University of Tsukuba Ibaraki, Japan)</i>	
A Reusable Edge AI System for Multimodal AI Companion: Performance and Response Evaluation....	377
<i>Yi-Cing Lu (National Central University) and Huang-Chia Shih (National Central University)</i>	

Session F2: Artificial Intelligence for HealthCare (AIHC) Workshop

Comparing Clinical and Machine Learning Approaches for Cardiac Mortality Risk Prediction	383
<i>Romina Gotzmann (Florida Atlantic University), Chelsea M. Zuvieta (Florida Atlantic University), and Taghi M. Khoshgoftaar (Florida Atlantic University)</i>	

Optimizing ResNet-50 for Multi-Class Diabetic Retinopathy Grading: An Explainable AI Approach	389
<i>Sampson Akwafuo (California State University, Fullerton), Srinjoy Maji (California State University, Fullerton), and Vishal Shinde (California State University, Fullerton)</i>	
Affordable Edge RGB+IR Fusion for Kitchen Safety Monitoring in Permanent Supportive Housing	395
<i>Sola Lhim (California State University, Fullerton), Kiran George (California State University, Fullerton), Tabashir Nobari (California State University, Fullerton), and Anand Panangadan (California State University, Fullerton)</i>	
End-to-End Digital Twin System for Cardiac Arrest Risk Detection: Design, Implementation, and Feasibility Evaluation	401
<i>Zahra Safari (University of Calgary), Emad A.Mohammed (Wilfrid Laurier University), and Behrouz H. Far (University of Calgary)</i>	
Minerva: GPU-Accelerated HPC Infrastructure for Biomedical AI and Scientific Computing	407
<i>Patricia Kovatch (Mount Sinai Health System), S M Shamimul Hasan (Mount Sinai Health System), Lili Gai (Mount Sinai Health System), Tejas Rao (Mount Sinai Health System), Wei Guo (Mount Sinai Health System), Hyung Min Cho (Mount Sinai Health System), Jieli Yu (Mount Sinai Health System), Yiyuan Liu (Mount Sinai Health System), Eric Rosenberg (Mount Sinai Health System), Sumit Saluja (Mount Sinai Health System), and Joshua Baker-Lepain (Mount Sinai Health System)</i>	

Session G1: Computer Vision II & Human-Centered Sensing

Adaptive Temporal Pooling for Environmental Sound Classification	413
<i>Seowoo Kim (Soongsil University, Korea), Jeongin Ju (Soongsil University, Korea), Eojin Kim (Soongsil University, Korea), Ju Seong Kim (Soongsil University, Korea), and Sunghin Im (Soongsil University, Korea)</i>	
Consulting Computer Vision Models Through Image Task Recommendation	419
<i>Jianquan Liu (NEC Laboratories Asia Pacific, Singapore), Ryo Kawai (NEC Corporation, Japan), and Kazuki Omi (Nagoya Institute of Technology, Japan)</i>	
TRACE: Transformer for Regularized and Accurate Cortical ECoG Motor Decoding	425
<i>Yifan Yu (Florida Atlantic University), Preston Billion-Polak (Florida Atlantic University), and Taghi M. Khoshgoftaar (Florida Atlantic University)</i>	
Scalable Multi-User Gaze Estimation for Co-located Environments Using Commodity Webcams ...	432
<i>Pasindu Thenahandi (Old Dominion University), Bhanuka Mahanama (Old Dominion University), Kumushini Thennakoon (Old Dominion University), and Sampath Jayarathna (Old Dominion University)</i>	

Egocentric Eye-Tracking in Collaborative Tasks: Quantifying Joint Visual Attention Using Wearable Glasses	438
<i>Kumushini Thennakoon (Old Dominion University, USA), Yasasi Abeyasinghe (Old Dominion University, USA), Bhanuka Mahanama (Old Dominion University, USA), Rochana Obadage (Old Dominion University, USA), Vikas Ashok (Old Dominion University, USA), and Sampath Jayarathna (Old Dominion University, USA)</i>	
A Reusable Ichthyometrics Framework for Monitoring Activity in High-Density Juvenile Fish Populations	444
<i>ChihWei Huang (Department of Electrical Engineering, National Taiwan Ocean University), JungHua Wang (Department of Electrical Engineering, National Taiwan Ocean University), and TsungWei Pan (Department of Electrical Engineering, National Taiwan Ocean University)</i>	
Touching and Feeling the Data: A Reusable Software Pipeline for Tactile Statistical Graphs in Accessible Education	450
<i>Lawrence Obiuewewi (Old Dominion University), Krzysztof J. Rechowicz (Old Dominion University), Jessica M. Johnson (Old Dominion University), Erika Frydenlund (Old Dominion University), Vikas Ashok (Old Dominion University), Sachin Shetty (Old Dominion University), and Sampath Jayarathna (Old Dominion University)</i>	

Session G2: Retrieval-Augmented Generation & Knowledge Graphs

Chronofy: A Temporal-Logical Decay Architecture for Information Validity in Time-Aware Retrieval-Augmented Generation	454
<i>Muntaser Syed (Florida Institute of Technology, USA), Marius Silaghi (Florida Institute of Technology, USA), Sheikh Abujar (University of Alabama at Birmingham, USA), and Sharun Akter (Daffodil International University, Bangladesh)</i>	
Defending Against Knowledge Poisoning Attacks During Retrieval-Augmented Generation	460
<i>Kennedy Edemacu (The City University of New York - College of Staten Island, US), Vinay M. Shashidhar (Northern Michigan University, US), Dan Abudu (Aston University, UK), Micheal Tuape (Lappeenranta-Lahti University of Technology, Finland), Beakcheol Jang (Yonsei University, South Korea), and Jong Wook Kim (Sangmyung University, South Korea)</i>	
SynthLineage: Provably Optimal Corpus Distillation and Knowledge Graph Provenance for Collapse-Resistant LLM Fine-Tuning	466
<i>Vikash Kumar (Independent Researcher)</i>	
ConstraintKG: Knowledge Graph-Grounded Detection and Repair of Structured Output Hallucinations in LLMs	472
<i>Vikash Kumar (Independent Researcher)</i>	
From SQL to Knowledge Graphs: An LLM-Driven Multi-Agent Approach with Data Schema Improvement	478
<i>Dinh-Khanh Pham (FPT Software, Vietnam), Quy-Anh Dang (Knovel Engineering, Singapore), Lam Mai Thanh (HCMC University of Technology and Education, Vietnam), Khanh Bui (University of Alberta, Canada), and Truong-Son Hy (University of Alabama at Birmingham, United States)</i>	

Explainable AI Question-Answering Framework: Integrating RAG with Knowledge Graph Reasoning	486
<i>Reeta Suman (The Southern Alberta Institute of Technology (SAIT), Canada) and Barile Barisua (The Southern Alberta Institute of Technology (SAIT))</i>	
TrAFSP: Trace-Retrieval Augmented Few Shot Prompting for Link Generation	492
<i>Nabin Chaulagain (University of North Florida), Nan Niu (University of North Florida), Sandeep Reddivari (University of North Florida), and Jianzhang Zhang (Hangzhou Normal University)</i>	

Session H1: Applications in Environment & Public Safety

A Guideline-Based Approach for Creating Personalized Storybooks with Generative AI	498
<i>Jiseon Yang (Ewha Womans University, Republic of Korea), Dahee Lim (Ewha Womans University, Republic of Korea), Jinyoung Huh (Ewha Womans University, Republic of Korea), Young Chang (Ewha Womans University, Republic of Korea), and Uran Oh (Ewha Womans University, Republic of Korea)</i>	
Single Image Raindrop Removal for Maritime Images	504
<i>Xeerak Muhammad (University of South Carolina, USA), Justin Schlag (University of South Carolina, USA), Yi Wang (University of South Carolina, USA), and Yan Tong (University of South Carolina, USA)</i>	
DeepSPE: Predicting the Association between Photospheric Magnetic Field Parameters and Solar Proton Events Using Ensemble Deep Learning	512
<i>Patrick O'Keefe (New Jersey Institute of Technology), Jason Wang (New Jersey Institute of Technology), and Vincent Oria (New Jersey Institute of Technology)</i>	
Machine Learning Based Modeling for Diabetes Prediction	518
<i>Chandra Sekhar Dammalapati (SUNY Oswego) and Xiaoliang Wang (SUNY Oswego)</i>	
Point & Play: A Mobile AR Campus Tour and Scavenger Hunt for Interactive Campus Exploration	520
<i>John Wright (Virginia State University, USA) and Wei-Bang Chen (Virginia State University, USA)</i>	
Cluster Overlap Rate in Dirichlet Mixtures	524
<i>Mohammed Ouali (Adrian College) and Bautista Rodriguez (Adrian College)</i>	
FireDataForge: A Unified Framework for Multi-Source Wildfire Data Retrieval and Integration	528
<i>Zeyu Xia (University of Virginia, USA), Lexie Chen (University of Virginia, USA), Ye Liu (Pacific Northwest National Laboratory, USA), and Huilin Huang (University of Virginia, USA)</i>	

Semi-Automated, Open-Sourced Utility Network Reconstruction using LiDAR and OpenStreetMaps... 532

Alyssa Acquaviva (National Laboratory of the Rockies), Al-Idrisi Haddad (National Laboratory of the Rockies), Owen Tanuwidjaja (National Laboratory of the Rockies), Deepthi Vaidhynathan (National Laboratory of the Rockies), Kumaraguru Prabakar (National Laboratory of the Rockies), and David Martinez-Biro (National Laboratory of the Rockies)

Automated Detection of Venous Beading in Fundus Images Using Patch-Based Deep Learning for Diabetic Retinopathy Staging 536

Noor Tabanjeh (Virginia State University, USA), Wei-Bang Chen (Virginia State University, USA), Yongjin Lu (Oakland University, USA), Xuanchen Xiang (Virginia State University, USA), and Qian Qu (Virginia State University, USA)

Session H2: Vision, Language & Emerging Applications

Position Sizing as a Risk-Control Variable: A Closed-Loop GRPO Framework for LLM Trading 540

Dazhi Li (Department of Computing and Software Systems, University of Washington Bothell) and Min Chen (Department of Computing and Software Systems, University of Washington Bothell)

LI-VAD: Lightweight and Interpretable Video Artifact Detection 545

Laurence Palmer (University of Southern California, United States), Ziang Xia (University of Southern California, United States), Haiyi Li (University of Southern California, United States), and C.-C. Jay Kuo (University of Southern California, United States)

MDF-MLLM: Deep Fusion Through Cross-Modal Feature Alignment for Fundoscopy Classification ... 551

Jason Jordan (University of Missouri-Kansas City), Mohammadreza Akbari Lor (University of Missouri-Kansas City), Peter Koulen (University of Missouri-Kansas City), Mei-Ling Shyu (University of Missouri-Kansas City), and Shu-Ching Chen (University of Missouri-Kansas City)

Scientific AI Agents Must Learn and Share 557

Thomas Pan (Alpha Mind Club, United States) and Jake Y. Chen (University of Alabama at Birmingham, United States)

Scene-First Vehicle-Evidenced Fusion for Urban Flood-Depth Estimation from Street Images 563

Huaqiang Guo (University of South Carolina, USA), Olivia Li (Dutch Fork High School, USA), and Yan Tong (University of South Carolina, USA)

TVDM-LLM: Schema-Aware Natural Language Querying for Transportation Surveillance Video Databases 571

Xin Chen (Governors State University) and Chengcui Zhang (University of Alabama at Birmingham)

Author Index 577
